PROGRAM

Throughout the course, equal importance is given to the development of the four basic language skills. The textbook has been selected because the texts and audio content are considered to have the capacity to generate discussion, in order to improve the level of oral expression. The deeper knowledge of the language is advanced, with exercises that consolidate the language introduced in the texts and audios.

Strategies are acquired to cope with the reading comprehension and listening comprehension areas of the official C1 level certification exams. Students are reminded of the need to dedicate time and effort outside the classroom to advance in the mastery of this level. Work is done in class in pairs and groups, and individually outside the classroom, to improve fluency and accuracy in oral expression.

In each semester two writing tasks are prepared, through the analysis of some models and practical exercises, in order to increase awareness of what it means to communicate well in writing. Students write their own texts, receive feedback and have the opportunity to improve their work .

The lexical items studied include:

- Collocation
