Artificial Intelligence in Journalism (Fcom, Op)

Teaching guide 2023-24

INTRODUCTION

Artificial intelligence in Journalism provides an approach to the foundations of the emerging AI-assisted newswork, together with a practical introduction to the AI tools for news gathering, production and publishing.

- **Degree:** [Journalism](#) + Diploma en Global Journalism
- **Module:** Module VI: Electives
- **Number of credits:** 3 ECTS
- **Year:** 3rd or 4th year
- **Semester:** 2nd semester (from January to May)
- **Type of course:** Elective
- **Instructors:**
 - Professor in charge:
 - [Dr. Ramón Salaverría](#)
 - Assistant professor:
 - [Dr. Clara González Tosat](#)
- **Language:** English
- **Department:** [Department of Journalism](#), [School of Communication](#)
- **Lecture schedule:** Tuesday, 12.00-13.45 hours
- **Classroom:** 1140 (Master Classroom), School of Communication

Final exam: Thursday, May 2, 2024 - 12.30 pm (classroom to be announced)

COMPETENCIES

The competencies indicated below correspond to those accredited for the Journalism Degree at the School of Communication, Universidad de Navarra.

Basic competencies

- **CB3.** That students have the ability to gather and interpret relevant data (usually within their field of study) to make judgments that include reflection on relevant social, scientific, or ethical issues.

General competencies

- **CG5.** Conceptualize, plan, and develop collaborative projects in the field of journalism.
- **CG7.** Search, identify, select, and prioritize any type of source or document (written, audio, or visual) necessary for the development of speeches or presentations.

Specific competencies

Universidad
de Navarra

- **CE12.** Understand the structure and operation of the communication company, its organizational form, management strategies, and systems for content production and distribution.
- **CE13.** Acquire knowledge and apply theory, skills, techniques, and tools necessary in the creation of informative products.
- **CE14.** Select and process information with the purpose of disseminating it for private or collective use through various media and platforms or in the creation of productions of any kind.
- **CE15.** Understand and apply the language and techniques specific to each traditional media (press, radio, and television), as well as new digital platforms (internet), and explore their possibilities for multimedia convergence.
- **CE16.** Command information and communication technologies and techniques in different media and languages.
- **CE20.** Identify and correct errors made in the creative or organizational processes of editing, production, and realization of informative products.

PROGRAM

Preliminary session. **Introduction to the class and activities**

Session 1. **AI-assisted Journalism**

- 1.1. Definition, history and key concepts of AI
- 1.2. Exploration of the impact of AI on news gathering, content creation, and delivery

Session 2. **Ethics and Bias in AI Journalism**

- 2.1. Ethical considerations and potential biases associated with AI-assisted journalism
- 2.2. Examination of case studies highlighting the ethical challenges in using AI for news production
- 2.3. Overview of legal frameworks and privacy concerns related to AI-assisted journalism

Session 3. **AI Tools for News Gathering**

- 3.1. Introduction to AI-powered tools for data mining, sentiment analysis, and news monitoring
- 3.2. Hands-on practice with tools to extract and analyze news data from various sources

Session 4: **Automated Content Generation (I): Text**

- 4.1. Overview of AI-generated content, including automated news articles and reports
- 4.2. Analysis of the benefits, limitations, and implications of automated text generation in journalism

Session 5: **Automated Content Generation (II): Image**

- 5.1. Overview of AI-generated photos and images

Universidad
de Navarra

- 5.2. Analysis of the benefits, limitations, and implications of automated image generation in journalism

Session 6: **Automated Content Generation (III): Video, Sound and Multimedia**

- 6.1. Overview of AI-generated video, sound and multimedia content
- 6.2. Analysis of the benefits, limitations, and implications of automated video, sound and multimedia generation in journalism

Session 7: **Automated Data Analysis and Visualization**

- 7.1. Overview of AI-driven data analysis and visualization in news
- 7.2. Discussion on how AI can enhance investigative journalism, data analysis, and uncovering hidden patterns

Session 8: **AI-Assisted News Delivery**

- 8.1. Examination of AI-driven techniques for personalized news delivery, subscription gathering and audience engagement
- 8.2. Case studies on the use of chatbots, recommendation systems, subscribers' tracking and user analytics in journalism

Session 9: **AI and Fact-Checking**

- 9.1. Exploration of AI-based fact-checking tools and algorithms
- 9.2. Discussion on the role of AI in combating disinformation in journalism

Session 10: **Future Trends and Challenges of AI in Journalism**

- 10.1. Exploration of emerging trends and developments in AI-assisted journalism
- 10.2. Reflection on the future impact of AI on the journalism profession and its role in society

[**Note:** Given the ever-evolving nature of AI-assisted journalism, this syllabus is designed to be flexible and adaptable to incorporate emerging and pertinent aspects.]

WORKSHOPS & ACTIVITIES

[To be developed.]

ASSESSMENT

General principles

Students are expected to do **all assignments and oral presentations in English**. No exceptions will be made for any student, regardless of their English language proficiency.

We promote the ethical use of information resources. For this reason, **plagiarism is not allowed** in this subject. Any copying in assignments, exercises, or other activities will be penalized. A work is considered plagiarism when it reproduces, either entirely or in part, textual, graphic, and/or audiovisual content from external sources without proper attribution. If professors detect any plagiarism in the practices, whether total or partial

Universidad de Navarra

(including a single paragraph, for example), the student will receive a grade of 0 for the corresponding assignment.

Likewise, **fraud is not tolerated**. Any deception, simulation, or forgery employed to illegitimately improve academic results will be penalized. In light of this subject's specific topic, it is important to **clearly differentiate between content authored personally by the student and automatically generated content**, whenever applicable.

Evaluation in ordinary call

In the ordinary call, **Artificial Intelligence in Journalism** is assessed as follows:

- **Assignments: 60%**
- **Tests: 20%**
- **Attendance and participation: 20%**

Each of these three elements is evaluated as follows:

1. Assignments (60%)

[To be developed.]

2. Tests (20%)

[To be developed.]

3. Attendance and participation (20%)

[To be developed.]

Criteria to pass the course

- Students whose final grade is 5 points or more will pass the course.
- Students whose final grade is below 5 points will not pass the course and will be graded as *Suspense*.
- Students who do not show up to at least 60% of classes will be graded as *No presentado*, unless they can justify their absence with evidences such as medical proof or something similar.

Evaluation in extraordinary call

For those who do not pass the course in the ordinary call in May (grades *Suspense* or *No presentado*) there will be an extraordinary multiple choice test exam in June, which will account for 50% of the final grade. The remaining 50% will be calculated with the average mark of the assignments, tests and participation throughout the semester.

Students with special learning needs

Universidad
de Navarra

Accommodation will be provided for students with special learning needs, either regarding the methodology and/or evaluation of the course, but they will be expected to fulfill all course objectives.

OFFICE HOURS

Dr. Ramón Salaverría (rsalaver@unav.es) — [CV](#) | [personal web](#) | Twitter: [@rsalaverria](#)

- Department of Journalism, desk 1531. Ismael Sánchez Bella Building.
- Office hours: Monday, from 5.00 to 6.30 pm

Dr. Clara González Tosat (cgonzalez@unav.es)

- Tutoring sessions will be conducted with students upon prior request via email.
