## **PRESENTACIÓN**

### **Breve descripción:**

The course aims to provide students with a broad knowledge of the history of dress and fashion in the West, from the ancient world (7th century BC) to the present day, which is necessary for them to be able to carry out managerial tasks in the fashion sector with professional competence.

To this end, taking into account how the clothes and fashions of an era, a country or a certain social sector tell us many things about the structures of society, lifestyles, tastes and mentality of the people, the course deals with clothing as a cultural element linked to ideas, art and history. In this sense, there are numerous and varied documentary sources that we deal with in the course in order to achieve the most exhaustive possible knowledge of this discipline, which is the history of dress and fashion.
