## **ASSESSMENT**

- Evaluation: There will be a continuous evaluation throughout the entire subject. Three elements will be taken into account, first the students' oral interventions in the different sessions completed, second the written individual development of a practical case, and a final test.
- Students' oral interventions: Given that it is a postgraduate degree we expect timely and adequate interventions from students to contribute to the topic addressed in each session. It

Universidad  
de Navarra

is easy to understand that it is not possible for everyone to intervene in every session, though it is important to intervene and contribute in the sessions, showing knowledge and preparation. Each member of the lecturing team will assess contributions by quality and not by quantity, while at the same time it will incentivate students intervention and try to give opportunity for everyone. Thus, it is important to intervene in an appropriate and adequate manner to further the discussion and show the student preparation and knowledge. Ideally, there might be an interest to intervene at least once before each member of the lecturing team.

- Practical case: A practical case will be given that students have to address individually and examine within a maximum of 6 content pages, i.e. 5 sheets with typography TimesNewRoman 12, adequate margins, i.e. 2 cms, and interspaces, i.e. 1 or higher.
- Test: The test objective is to check the level of knowledge acquired on the subject.
- **FINAL MARK.** The final mark will be obtained by applying the following criteria:
  - Sessions participation: 30%
  - Practical case: 30%
  - Final test: 40%
