

Presentation

Briefly description:

The aim of the Financial Accounting I course is to build a strong foundation for learning about financial reporting. Accounting is the language of business and we will work hard to learn that language, so that students can understand financial documents, stories and presentations. Students will recognize how accounting affects our perception of value creation and management performance. The course covers the key terms and concepts of accounting as defined by the International Financial Reporting Standards, the construction of financial statements, and the methods of recording transactions. Upon completion of the course, students should be able to explain accounting terms, interpret amounts found in financial statements, and predict the consequences of various transactions on the financial results and the financial standing of a company.

ACTIVITIES

I. Classroom teaching activities

1. Lectures

Lectures are given by the professor on the themes indicated in the syllabus with the help of the blackboard, power point presentations and videos. The professor will post on ADI the power point presentation, the notes for each topic and some recommendations for further reading.

2. One-to-one tutorials

Universidad
de Navarra

Each student may have personal interviews with the professor to help him/her with personal study and learning.

3. Evaluation

Exams and assignments to assess the successful accomplishment of the objectives

II. Personal work

Students must understand themes covered early in the course to be able to comprehend information presented later in the course, and will have to be able to integrate material learnt throughout the course. Therefore, it is important that they do not fall behind and try to set aside regular times outside of class to work on the course material on a daily basis.

1. Students must read the assigned reading for a subject before the lecture covering that topic. Being familiar with topics beforehand will allow students to get the most out of the lecture.

2. Students should conduct personal study using the professor's notes, notes taken in lectures and recommended books if needed.
