## SKILLS AND COMPETENCIES

Students can understand extended speech and lectures and follow complex arguments on familiar topics. They are able to comprehend most television news and current affairs programmes, as well as the majority of films in standard dialect.

Overall, a B2 English course prepares students to function effectively in academic and professional settings where English is used, supporting both independent learning and further language development.

In reading, learners can read and understand articles and reports on contemporary issues in which the authors adopt particular attitudes or viewpoints. They are also capable of understanding contemporary literary prose.

In terms of spoken interaction, B2-level users can interact with a degree of fluency and spontaneity that makes regular conversation with native speakers quite possible. They can actively participate in discussions in familiar contexts, presenting and defending their opinions with relevant explanations and arguments.

For spoken production, they can give clear, detailed descriptions on a wide range of subjects related to their field of interest. They are also able to explain a viewpoint on a topical issue, outlining the advantages and disadvantages of various options.

In writing, students at this level can produce clear, well-structured texts on a wide range of subjects. They can write essays or reports, conveying information or offering arguments for or against a particular point of view. Additionally, they can write letters that convey the significance of personal experiences and events in a detailed and coherent manner.
