- **Final exam:** May 6th at 12:00 in Classroom 11. (Applicable 2025-2026 school year).

LEARNING OUTCOMES (Competencies)

No former skills or knowledge of photography are required to take this course.

Good photos are taken by a combination of experience, knowledge and intuition. This course aims to help students acquire all of the necessary knowledge for taking dynamic photos in addition to giving them some experience and feedback. Thanks to the advances in technology, technical knowledge is less relevant now than it used to be, which is why this course places considerable emphasis on teaching students about the visual language, that is, the way our brain "reads" and interprets an image.

PROGRAMA

	Topic		Topic
1	Introduction to the course	2	A technical explanation of the camera. Activity 1.
3	The photographic process	4	The photographic process

5	Visual language: concepts and exercises	6	Visual language: concepts and exercises
