

Fashion Marketing (FBA)

Guía docente 2026-27

INTRODUCTION

In this subject, consumer behavior will be studied in order to understand what consumers value, analyzing them as a social agent. We shall look at how social conditions influence people's decisions but, on the other hand, how these choices affect the maintenance or transformation of the initial conditions. We shall also analyze how the preferences, tastes and opinions of people are formed. This subject also aims to address the application of fundamental concepts of the Marketing Fundamentals Module to the fashion sector: how to develop and analyze market surveys; more in-depth brand management; understanding the special aspects presented by Luxury/Prestige brands; and learning about the main tools of fashion communication. In addition, special emphasis shall be placed on the elements of distribution and the implementation of commercial strategies. In this respect, we shall analyze the management of customer value, the management of the sales force, the distribution channels (design and management), and students will be guided towards creating a marketing plan.

COMPETENCIES

CG01 – Development of a problem-solving approach; becoming accustomed to thinking critically and proposing creative solutions to problems.

CG02 - Identification and effective handling of information relevant to the work. Exhaustive management of information sources within the fashion industry and gathering of data, contrasting them with different situations.

CG03 – Development of personal skills for management: prioritizing objectives, programming activities in an appropriate manner and executing them within the foreseen period, revealing a capacity for criticism, reflection, time management, sensitivity to human diversity, in different situations and in different cultures, as well as an ability to continue learning through experience.

Universidad de Navarra

CG04 - Achieving effective performance in teamwork environments. Developing the ability to foster an environment of collaboration, communication and trust among team members, as well as diagnosing, facing and resolving interpersonal conflicts without damaging personal relationships.

CG05 - Listening to and conveying ideas effectively, using the appropriate channel at the right time, basing your observations and conclusions on specific data.

CG08 - Acquiring new knowledge, modifying habits and being open to change.

CG09 - Recognizing and addressing the ethical and social responsibility dilemmas in an appropriate manner, applying deontological principles and organizational values to the situations and options that are presented.

CG10 - Developing business leadership, not only as a matter of knowledge, technology or charisma, but becoming aware that it also feeds on generosity, creativity, enthusiasm and the example of one's own behavior, as well as an ability to create a climate of trust among collaborators.

CB6 - Possessing and understanding knowledge that provides a basis or opportunity to be original regarding the development and/or application of ideas, often within a research context.

CB7 - Students should know how to apply the knowledge acquired and have an ability to solve problems in new or unfamiliar environments within broader (or multidisciplinary) contexts relating to their area of study.

CB8 - Students should be able to integrate knowledge and face the complexity of making judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments.

CB9 - Students should know how to communicate their conclusions and knowledge and the ultimate reasons that underpin them to specialized and non-specialized sections of the public in a clear and unambiguous way.

CB10 - Students should have the learning skills that allow them to continue studying in a way that is largely self-directed or autonomous.

CE02 - Students should develop, from an anthropological point of view, the concepts of motivation, organizational dimension, management style and organizational behavior.

CE01 - Students shall acquire the knowledge and precise skills to define and evaluate the "Marketing Mix," the management of operations, the strategy and business model, the financial management and the economic impact of decisions within the fashion industry.

CE04 - Managing techniques relating to the management of operations (products, processes, information systems, etc.) at fashion companies; being able to diagnose and implement continuous improvement processes.
