

PRESENTATION

The Market Research course enables students to deepen their knowledge of plans, projects, and strategies related to marketing, specifically focusing on Commercial Research. Students will learn how to design market research, prepare reports, and assess their application in the business world. Throughout the course, various market research techniques will be identified and analyzed, including in-depth interviews, focus groups, neuromarketing techniques, surveys, and experimental studies. Additionally, different sources of information and key techniques for analyzing both qualitative and quantitative data will be examined. Students will have the opportunity and challenge of designing and implementing a comprehensive market research project.
