

Quality ManagementGuía docente 2025-26

PRESENTATION

Course description

The objective of the course is to help students develop competencies to correctly identify problems, their causes and solutions. To this end, Quality Management and Continuous Improvement are fundamental tools and tasks in business management.

In class we will address different points of view, but we will focus on Quality and Continuous Improvement as a transversal tool for strategic thinking: seeing the customer as a key stakeholder and implementing a policy of continuous improvement in the company.

We will discuss why Total Quality Management (TQM) organizations have sustainable competitive advantages and what their main drivers are.

The course also covers the learning of quality and continuous improvement tools.

The syllabus includes continuous improvement methods for the three levels of quality: products/services, processes and systems. Techniques such as Lean, Kaizen, Quality Function Deployment, Ishikawa Diagram, Five Why's, 5-S and others will also be applied.

No specific prior training is required to follow the course, but intense work and participation is expected from the student.

• Type: Elective • ECTS: 6

Module: 7 Elective coursesSubject: 7.1 General Electives

Semester: Sep-DecLanguage: English

• Title: Quality Management

Class hours:Classroom:

• Professor: Ricardo Mateo Dueñas

Exercises carried out in class: the students will learn to develop and manage tools related to Total Quality Management.

Exam: the students will be able to demonstrate the domain of concepts and problems related to Total Quality Management.

PROGRAM

Chapter 1: Introduction to Quality Management

Chapter 2: Tasks in quality management

Chapter 3: Quality in products and services

Chapter 4: Quality in Processes

Chapter 5: Quality in systems

Chapter 6: Basic tools Q7 and M7

Chapter 7: Advanced tools for planning, control and quality improvement

Chapter 8: Design of quality systems and continuous improvement

Chapter 9: Quality and Continuous Improvement in New Product and Service Launchings

Chapter 10: Quality strategy and continuous improvement

EDUCATIONAL ACTIVITIES

1. Classroom lectures: 60 hours.

Students are expected to actively participate in class.

2. Other activities: 90 hours.

2.1. Ongoing individual work: 30 hours.

It is strongly recommended to study the classroom lectures, read the provided documents and prepare the case studies and exercises.

2.2 Team Project: 30 hours.

Students will analyze in depth and present in class a Quality Management Project, linking root cause analysis and complex problems.

Each team will submit duringf the semester a written report and a PowerPoint slide deck, and will present their work in front of the rest of the class.

2.3. Final exam: 30 hours.

Preparation for the final exam should not be left to the last minute. A two-hour-week dedication should be enough for studying the course main concepts and their application.

The 2 hour final exam will include short essay questions from the course syllabus, and a Case Study.

ASSESMENT

Ordinary (Dec.) Calls

The Quality Management final grade will be calculated as follows:

- Weekly assignments and exercises: 30% of course grade
- Team Project: 30% of course grade.
- Final exam: 40% of course grade.
- The exam will consist of a few short essay questions on any of the topics from the syllabus (1h. Close book. 50% of exam mark), and the resolution of a short case study (1h. Open book. 50% of exam mark).

Extrordinary (Jun.) Calls

- Final Exam: 100%
- The final exam will consist of a few short essay questions on any of the topics from the syllabus (1h. Close book. 50% of exam mark), and the resolution of a short case study (1h. Open book. 50% of exam mark).
